

BUILT TO LAST

Note: Part numbers with a + are packed and sold as pairs.

Combines upgraded and refined damping rates, with all the fade-free damping control benefits of gas pressurization. Delivers enhanced handling and control without any compromise in ride comfort.

Product features

- Exclusive Twin Disc System
- Nitrogen gas pressurized for optimum performance
- Teflon banded pistons for low friction and long durability
- 12.4 mm piston rod diameter and 44.1 mm piston tube
- Suitable for cars and pickups
- High displacement, multi stage valving for precise control
